Open Letter

"We encourage the view of sustainable development and believe that providing clients utility services with highest quality at the best possible cost is an important factor determining the success and reputation of the company. We clearly comprehend that logistics plays a critical role in today's economy. Our mission is to create a leading logistics brand of Vietnamese with a deep sense that our development is associated with the growth of clients, employees, and society."

Mr. NGUYEN XUAN PHUC
CEO of U&I Logistics Corporation

As a reliable provider includes best-in-class flexible logistics services with comprehensive features: dedicated customer service, secure information system, professional employees, optimal cost, etc. In our service philosophy, the right logistics solutions are the foundation to promote the growth of a business, ensuring supply chain safety and effectiveness. Once logistics management is ineffective, businesses not only lose competitiveness but also find it difficult to assert themselves in global value chains.

With our memo "CLIENTS' INTERESTS FIRST", we aim to become great pillar of import export business with 4 core services:

- ▶ Customs brokerage agency
- ▶ Warehousing & distribution
- ▶ International freight forwarding service
- ▶ Inland transportation

In all our endeavors, 2,000,000 m² of storage capacity is continuously developed combined with promoting our employees's personal development and mobilization of their inner resources. More than 150,000 TEUs of goods are shipped and 100,000 customs declarations are carried out annually. We strive to supply performance expectations beyond any doubt to meet all requirements of clients in domestic and foreign markets.

Customer satisfaction is a key jump off point for us to improve and enhance.

Yours sincerely!

About us

"CLIENTS' INTERESTS FIRST"

With our existing infrastructures, owned assets, cutting edge Supply Chain Suite, we are proud to be a pioneer in providing services of Customs Brokerage, Warehousing & Distribution, Inland Transportation, and International Freight Forwarding with strong ability to serve various industry verticals.

"**CLIENTS' INTERESTS FIRST**" has always been our strategic motto. U&I Logistics believes that providing customers utility services with highest quality is an important factor determining the success and reputation of the company.

Along with the increasing demand for logistics services, member companies in turn were established to expand our scope of logistics services in a more specialized approach, including:

- Container pick-up/drop-off process tracking

GREEN Logistics

At U&I Logistics, the responsibility to protect the environment always accompanies the development of the business. Responding to the message "***We are part of the solution - For nature***"

The vivid aimed picture is a "green" logistics business, persistently acting for the earth, for nature, for the living environment for the community. With the use of:

- **SOLAR SYSTEM**, a unit promoting the use of clean energy such as energy lighting and energy electrical systems
- In **SCIENTIFIC MANAGEMENT PROCESS**, we use clean energy forklifts to reduce emissions and increase air quality in the warehouse. Electric forklifts are the ideal choice to ensure the safety of goods and improve the working environment for employees.

Technology Ecosystem

The most significant of U&I Logistics is our diverse ecosystem, including technology solutions that are flexibly and effectively applied to the company's services.

U&I Logistics is proud to have its own comprehensive digital transformation solutions to solve problems of logistics enterprises, such as:

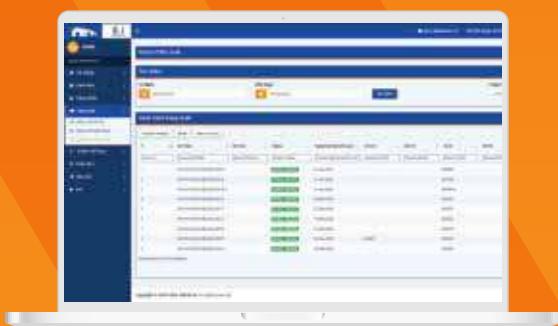

- Managing information systematically and effectively, ensuring high security.
- Optimizing all processes and human resources in services
- Reducing operating costs, improving labor productivity
- Enterprise management in an automated, precise and flexible way
- Developing a digital environment.
